

FLEXI-LINE 3D

VEXICA

A Super Flexible Linear LED Luminaire With Diffuse Output in a Choice of CCT and Colour Options

16mm x 16mm | Dual Axis '3D' Bending | Indoor & Outdoor Use

Remote Driver

**MADE IN
BRITAIN**

Features & Benefits

Dual Axis '3D' Bending

Flexible in both top and side directions this luminaire can effortlessly conform to the most complex profiles.

Wide Range of LED Selections

Static White, Tunable White, RGB and RGB Dynamic options are available at CRI 90 as standard. 24V and 48V options available.

Superior Flexible Technology

A high-grade, super flexible silicone body ensures environmental robustness and longevity.

Linear Homogeneous Output

Diffused opal finish for a 'dot-free' homogeneous appearance.

Choose Your Length

Lengths up to 50m with on-site cutting options available.

Customisable

Speak to your Vexica representative about any specific requests you have for your project.

Compliance

UKCA, CE, UL, IP67

5-Year Warranty

Standard 5-year warranty, L70 (Static White) @ >50,000 hours.

The above output values are specified at CRI 90 as standard. Static white options also available at CRI 80 on request.

If the data that you require is missing, please contact your Vexica representative.

¹ Tunable White consists of 2 channels each rated at 7W/m. Lumen values for 2500K & 4500K are taken with the respective channel at 100%. The 'Max' value is taken with both channels at 100% and the combined total output being 14W/m.

² RGB consists of 3 channels (Red, Green & Blue), each capable of outputting 1/3 of the maximum luminaire power. The 'Max (White)' value is taken when all channels are at 100% and the fixture is drawing the maximum total luminaire output of 14W/m.

Vexica run regular development cycles, continuously optimising and balancing product specifications to best suit our customers. All information therefore, is intended as a guide and specifications may change on occasion without notice or announcement. Technical data is measured under controlled conditions, expected performance is within +/- 10% of advertised figures. Luminaire output stated is actual value from the luminaire itself. Information provided above is intended as a description of the product and shall not be used in the form of any contract.

NOTE
Luminaires are supplied as complete 'bare reels' only to be cut to final installation length on site. Separate end caps are required to terminate and waterproof the luminaire for operation. When installed as directed, the glued end caps will add 7mm to the cut length of the luminaire.

BEAMSHAPE

^a Static white is available with a 5m maximum run length as standard, for extended runs up to 50m our ultra long model (24V or 48V) should be selected.
^b Tunable White consists of 2 channels each capable of 50% at the maximum luminaire power rating. When both channels are AT 100%, the maximum power output of the luminaire will be achieved.
^c Each colour channel represents 1/3 of the maximum luminaire power output. When all channels are at 100% the luminaire maximum output will be achieved.
^d Must be used in conjunction with Vexica HybridDrive6 driver plus PSU. Max cable length from driver to first fitting is 1m, any extensions will require additional equipment. Contact your Vexica rep for details.

END CAP ACCESSORIES (For On-Site End Preparation)

To ensure correct operation and maintain IP rating, bare reel or site-cut luminaires must be terminated using one of the end cap kits below.

Kits must be applied following the procedure in the Flexi-Line 3D installation guide. Failure to do so may result in incorrect operation and will void any warranty.

If you require guidance, please contact your Vexica representative who will be happy to assist.
